

Your Privacy and Security Are Our Priority

We've invested in technology to serve you better.

Your financial data is protected by the most stringent industry standards

- Phreesia is built to meet and exceed the strict security requirements of the healthcare and financial services industries to ensure that all of our users are protected.
- Phreesia is PCI-compliant, registered as an approved solution with Visa and MasterCard, and uses top encryption and security technology to protect your financial information.

Your health information is safe with us

- Phreesia employs leading physical and technical security measures to store and protect health-related data. Patient information is always encrypted, firewall-protected and is under surveillance 24 hours per day, 7 days per week.
- Your data, health information or credit card data is never stored on the PhreesiaPad.
- Phreesia never sells or discloses protected health information for commercial use.

The highest security standards ensure that your information is always protected

- Credit card information is never stored by Phreesia.
- Practice staff does not see your entire credit card number—only the last four digits—to ensure that the data is unusable in the event of a breach.
